

4-39-202 General facility requirements.

- (1)
 - (a) Internal handling facilities shall be capable of humanely restraining an individual animal and to facilitate:
 - (i) the application or reading of any animal identification;
 - (ii) the taking of blood or tissue samples; and
 - (iii) any other required or necessary testing procedure.
 - (b) A domesticated elk facility shall be properly constructed to protect inspection personnel while they are handling the domesticated elk.
- (2) The domesticated elk facility owner shall provide ample signage around the facility indicating that it is a domesticated elk facility, so that the public is put on notice that the animals are not wild elk.

Enacted by Chapter 302, 1997 General Session
